Re: Closure, Ground Water Discharge Permit
No. UGW230001

Dear Mr. Spor:

After reviewing comments in your latest ground water monitoring report dated April 11, 1995, and a telephone conversation with you on April 24, 1995, regarding the subject, we believe the neutralization criteria for your site needs to be established now. As we discussed earlier, your permit (Part I F 1) states the neutralization procedures must be submitted for review and approval six months prior to the beginning of neutralization. The criteria for pad closure and post closure ground water monitoring also needs to be established, as well as several other issues.

Please submit within 30 days of receipt of this letter an itemized schedule for completing these requirements, as it appears you are nearing the end of the rinsing phase. If you think it would be productive to meet prior to the above submittal, or if you have any questions, give me a call at (801)538-6084.

Sincerely,

Mack G. Croft, Environmental Scientist
Ground Water Protection Section
